

1010 CURVE

The Curve series, which has a more compact housing than the 1010 family, is a great option when space is limited. Standard vibration dampers are included, providing an advantage when the ground is uneven. The 1010 Curve is suitable for use on forklift trucks and demolition robots where less light output is required. It is also used on large construction machinery and in other applications.

LED work lights are exposed to dirt, fertilizers, road salt, acids and more. For best performance and long lifetime, the lens and the cooling fins must be cleaned on a regular basis.
