

# D8 REDPOINT

D8 Redpoint increases safety and minimises the risk of accidents around machinery. It allows safety to be visual instead of relying solely on sirens and alarms. The D8 Redpoint projects a light beam as a concentrated, visible square on the floor in front or behind the machine.

This warning light is also available as a standard work light, allowing you to match your machine lighting for a unified design.

Note: the lens of the Redpoint is clear, the red light is emitted from LEDs

LED work lights are exposed to dirt, fertilizers, road salt, acids and more. For best performance and long lifetime, the lens and the cooling fins must be cleaned on a regular basis.
