

1010 REDBEAM

Note: the lens of the RedBeam is clear, the red light is emitted from LEDs

The BlueBeam and RedBeam LED are powerful spot lights, with a wider beam pattern than the BluePoint and RedPoint. Along with the bright red colour, the RedBeam serves a practical purpose, ensuring operators of crop sprayers have full visibility of the nozzle spray being spread across the fields with its powerful illumination.

LED work lights are exposed to dirt, fertilizers, road salt, acids and more. For best performance and long lifetime, the lens and the cooling fins must be cleaned on a regular basis.
